- Rental App is a web application that allows users to post and rent products
- Created the user dashboard that showed all user's posted products and products being rented
- **Technologies: Python, Django, JQuery, HTML, CSS, Bootstrap, SQLite**

WORK EXPERIENCE

Associate Product Manager - Dot&Bo   **January 2016 - September 2016**
- Led User Acceptance Testing to ensure all new product functionality have been created as designed on time; measured performance against custom-made product requirement documents for new Storefront by working closely with Engineering Team
- Improved customer and internal user experience by researching data, gathered requirements, creating Product Requirement Documents, including specifications on new website functionality, and designing Wireframes using Balsamiq tool for desktop and mobile experience
- Led and collaborated with Engineering team on sprint planning to assure that prioritized product features, which was based on the product roadmap, would be completed on time within two week cycle periods through agile methodology
- Tested and measured performance on various email campaigns by A/B testing to see which types of email strategies were more effective to the customer and deployed those respective campaigns to bring in thousands of dollars more in revenue

Lead Data Analyst - Dot&Bo   **August 2015 - January 2016**
- Collaborated with management and key internal stakeholders to create and maintain KPI dashboards for the Content, Finance, Operations/Vendor Management, and Marketing teams using business intelligence tool, Looker
- Performed numerous product pricing and shipping optimization model analysis for the merchandising team by looking at historical purchase data, during the holidays to boost customer purchases and revenue
- Created with VP Merchandising/ Co-founder a methodology for "Best Selling Products" based on key metrics for our top 15 categories on our website; this new organization helped physical product placement on website to better market strong performing products and boost revenue

Senior Data Business Analyst - Accenture   **May 2014 - May 2015**
- Completed necessary client board design documents for new release of the COTS product successfully by attending client board meetings and gathering requirements from the client
- Improved system testing, product testing processes, and helped develop maintenance schedules by collaborating closely with manager and test lead on associated tasks
- Generated SQL queries, Excel, and Word documents to update the product test deliverable by working with test lead; updates were successfully used for the offshore test team
